Course and Instructor Evaluation

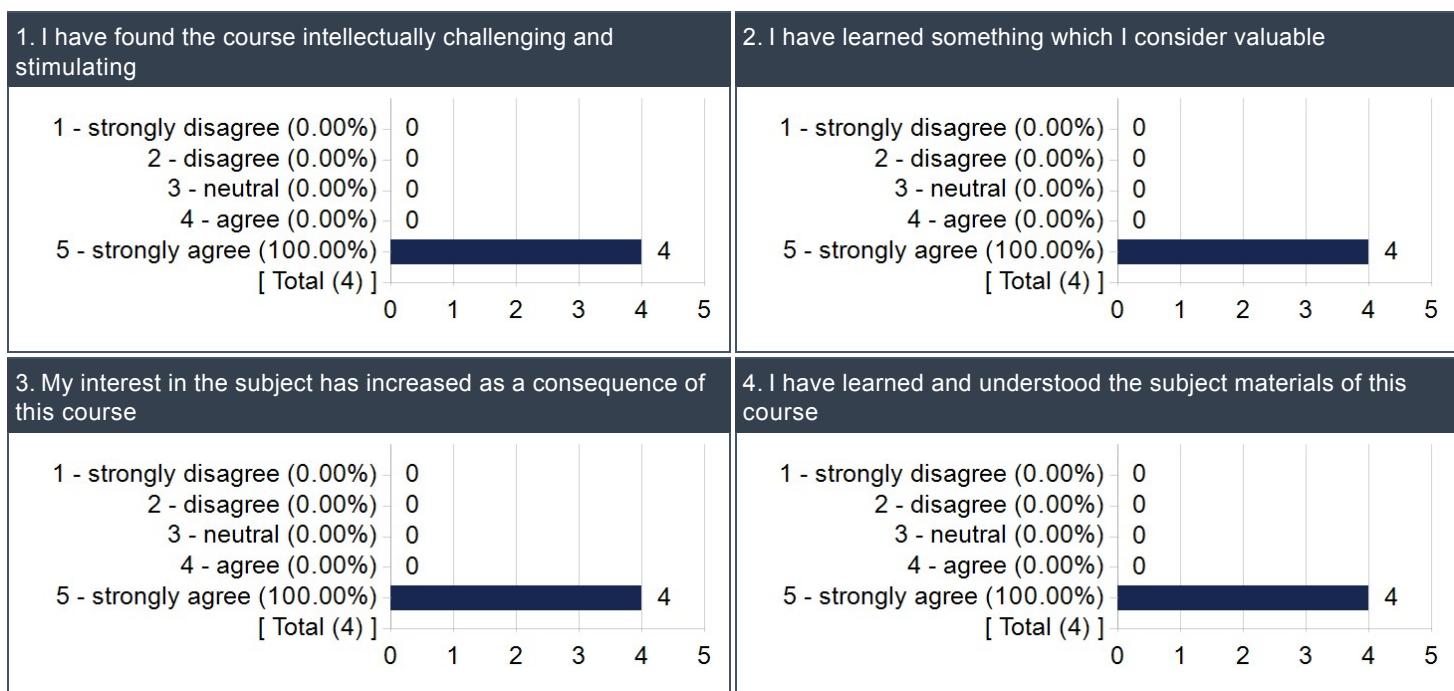

Past research shows that the students' answers to any one question can be noisy, more prone to biases, and provide less useful data for evaluating courses and instructors. Since interpreting individual questions, including their relative highs and lows, can easily lead to inaccurate conclusions due to low reliability, individual question responses are not available in any standard report.

However, combining students' responses to several questions aimed at measuring the same underlying attribute can improve the quality of the measures. Therefore, the statistics displayed for each attribute (mean, median, mode, and standard deviation) are calculated from the grouped responses to all the questions in each topical block.

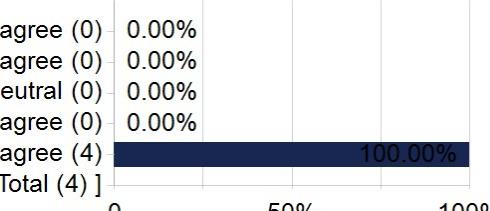

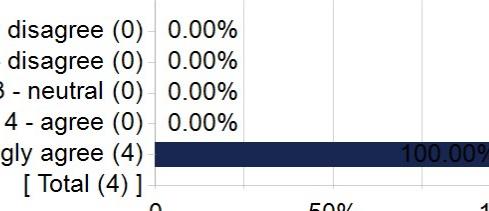

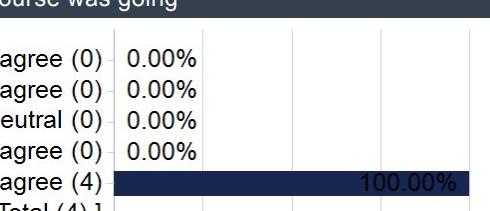

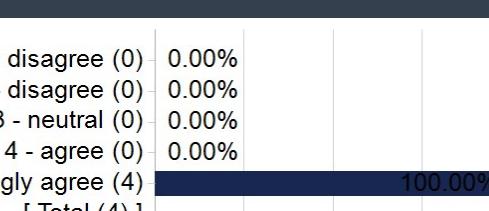

All questions below use a 5-point response scale: 1-strongly disagree to 5-strongly agree

Short Answer Responses

What would you like to tell other Wash U students thinking about taking this course?

Comments

This is a great coverage of environmental policy and governance and very useful in understanding the current environmental policy.

Describe at least one activity (an exercise, project, assignment, etc.) in this course that helped you learn.

Comments

The final project let me focus on an area I was interested in and allowed me to incorporate what I had learned throughout the year.

Describe at least one aspect of how this course was designed and carried out (the organization, structure, communication, etc.) that contributed to your success.

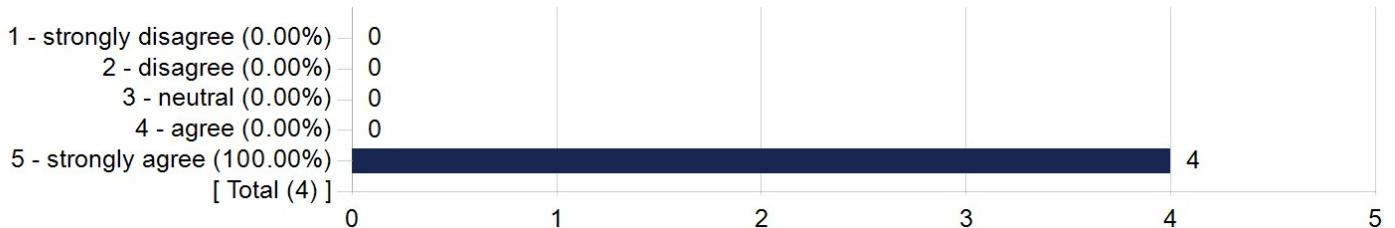

Comments

I liked the news items that allowed us to connect what we were learning to the real world.

Classroom Environment

The instructor **Zachary Bowersox** promoted an inclusive learning environment with regard to the diversity of student personal backgrounds and identities.
